TRUWHITE®

Australian Patent #: 2014101510

Masking Film that Works Like Paper ...Only Better!

THE NEW ALTERNATIVE MASKING FILM TO YOUR TRADITIONAL PAPER

This superior masking paper alternative offers the ultimate penetration resistance from solvent and waterbased paint that are used in today's systems.

No surface contamination problems with TruWhite when tearing and corona treatment is applied to both surfaces for maximum paint adhesion.

AVAILABLE IN BOTH LENGTHS

Hand Dispenser Rolls & Machine Dispenser Rolls

BODYWORX

by GPI

ACRYLIC PRIMER FILLER

This high build acrylic based product is unique.

The formulation ensures that there's no need to apply a putty and a primer over a prepared surface.

The only product that's needed is the 1K Primer Filler.

Save time and money

* Aerosol

SIZE	CODE
1 Litre	BWPF1
4 Litre	BWPF4
400 gm*	BWPF A
400 gm* (Olive)	BWEP OA

ACRYLIC PRIMER

A single pack automotive primer designed to be compatible with all existing single pack acrylic paint systems.

Suitable for spot repair and full respray. Specifically designed for use with single pack acrylic top coats.

Properties include: Excellent adhesion to correctly prepared surfaces including bare steel; good filling qualities; smooth lay down; quick drying; easy to sand; and excellent hold out

* Aerosol

SIZE	CODE
1 Litre	BWAP1
4 Litre	BWAP4
400 gm*	BWPA

ACRYLIC FLEX AID ADDITIVE

An additive for use with Acrylic Paint to improve flexibility, making it more suitable for flexible substrates, such as bumper bars.

Mix One cap full (20 mL) of Flex Additive (Acrylic) to 1 Litre of Acrylic paint.

COLOUR	SIZE	CODE
Clear	500 mL	BWFA

ACRYLIC TOP COATS CLEAR & COLOUR (AEROSOLS)

A high quality top coat giving a full gloss finish.

COLOUR	SIZE	CODE
Clear Coat	400 gm	BWACCA
Black	400 gm	BWAGBA
White	400 gm	BWAGWA

ACRYLIC TOP COAT GMH MATT BLACK

A quick drying acrylic with a low gloss finish. Ideally suited for subframes, radiators, interior panels, luggage areas, differentials, tail shafts and engine bays.

May be used for covering overspray around subframes and under mudguards previously painted underbodies / chassis in sound condition.

Supplied ready for use. No thinning required.

* Aerosol

SIZE	CODE
20 Litre	BWGB20
4 Litre	BWGB4
400 gm*	BWGBA

ADHESIVE REMOVER

Mild Citrus-based product that is designed to remove adhesive residue from body moulds safely and easily without the use of caustic chemicals

SIZE	CODE
4 Litre	BWAR4

ANTI-SILICONE DROPS

BodyworX Silicone Drops can be used with acrylic paints to promote flow and leveling, whilst eliminating problems associated with silicone contamination

MIXING RATIO

Shake well before using, add a few drops to 1 Litre of paint and mix well.

TYPE	SIZE	CODE
Anti-Silicone Drops	25 mL	BWSD

ANTI-CORROSION

Is an O.E.M. approved anti-corrosion wax based sealer. Features capillary reaction (climbs upward). Flows into hard to reach areas.

Meets U.S.A. Military specifications.

- * Aerosol
- # Apply with a European Thread Schutz Gun

COLOUR	SIZE	CODE
Amber #	1 Litre	BWAC1
Amber	350 gm*	BWACA

BODY DEADENER BRUSH-ON

A heavy bodied black bituminous sealer and sound deadener that provides protection against stone damage and corrosion.

Recommended for its sound deadening properties by reducing panel, engine and road noise when applied to the underbody and floor pan.

SIZE	CODE
1 Litre	BWBBD1
4 Litre	BWBBD4

BODY DEADENER SPRAY ON

A bitumen-based spray-on underbody protectant and sound deadener. Forms a permanently elastic, anti-corrosion protective film and also acts as a sound deadener.

Recommended for its sound deadening properties. Can significantly reduce panel, engine and road noise when applied to the underbody and floor pan.

Can be overcoated with most paint systems without the bleed-through problems normally associated with conventional bitumen-based body deadeners.

- * Aerosol
- # Apply with a European Thread Schutz Gun

SIZE	CODE
#1 Litre	BWSBD1
4 Litre	BWSBD4
20 Litre	BWSBD20
400 gm*	BWSBDA

BODY FILLER

Is a high grade body filler made from the highest quality raw materials utilising the latest resin technology. Manufactured using a superior vacuum mixing system which eliminates air from the filler when mixing reducing the incidence of pinholes.

It is also perfect under both 2K, single pack and air dry paint finishes and primers. Superior sanding, fine filling, tack-free and maximum bonding makes this ideal body filler for the professional.

SIZE	CODE
375 gm	BW375
750 gm	BW750
3.4 Kg	BWPBF

BOOTH MAINTENANCE

A quick-drying polyvinyl alcohol solution designed as a coating to protect spray booths from the build-up of over-spray on painted walls.

- Dries to a clear film
- Can be removed with water
- Can be applied with a conventional paint gun

LIQUID FLOCCULANT TREATMENT FOR SPRAY BOOTHS

An easy to use treatment for spray booths. Water wash booth. Water Based - Spray Gun Cleaner.

TYPE	SIZE	CODE
Clear Booth Coating	10 Litre	BWBC1
Clear Booth Coating	25 Litre	BWBC
Liquid Flocculant	5 Litre	BWLF5
Liquid Flocculant	20 Litre	BWLF20

BRUSHABLE SEAM SEALER

Fills gaps and seals against moisture, dust and rust.

Is a flexible, fast setting sealant for sealing spot welded joints or bolted coach joints such as floor pans and wheel arches.

Suitable for filling gaps in lap joints and seams to protect against moisture and rust, ideal for sealing tail light and headlight openings and much more.

SIZE	CODE
1 Quart	BWBSS

BUMPER / PLASTIC PAINT COATINGS

PRIMER

BodyworX Plastic Primer is easy to apply and is specifically designed to adhere to all plastic auto parts. Thinning 30 - 40%

Suitable substrates: ABS, PP/EPDM, PP, SAN, PC, PA, PUR-RIM, R-TPU, PPO, PBT, PUR, SOFT FOAM, UP-GF.

Not suitable for vinyl upholstery.

COLOUR	SIZE	CODE
Grey	1 Litre	BWBP

TEXTURE COATING

SIZE	CODE
1 Litre	BWBT
400 gm*	BWSTA

BUMPER COATINGS

BWBCEA - For Ford EA Falcon

BWBCVN - For Holden VN Commodore

Commodore

Flexible factory pack bumper bar paint which has been designed specifically for use on bumper bars. Suitable Substrates: sound existing finishes, new bumper bars primed with plastic primer.

Up to 100% reduction may be required using a multi-purpose thinner.

* Aerosol

Silver Gal	400 gm	BWSGALA

FIBREGLASS REPAIR PRODUCTS

FIBREGLASS REPAIR KIT will repair cracks and holes in walls, fibreglass, wood, steel, masonry and other inflexible materials, repairs can be made to fibreglass and wooden boats, kayaks and surfboards.

Kit Contents: Mixing Container, 500 mL Fibreglass Resin, 1 Sq Mtr Fibreglass Matting, 10 mL Hardener (Catalyst), Brush, Mixing Sticks, Glove and Instructions

REINFORCED FILLER

A short strand, fibre and Kevlar reinforced body filler ideally suited for weld areas and bond lines to prevent stress cracks and repair mapping. Is also perfect for rust repair and filling holes in metal, wood and fibreglass.

SIZE	CODE
500 mL	BWFRK
1.36 Kg	BWRF

FINISHING PUTTY 2K

BodyworX European 2K Polyester Finishing Putty is an advanced tack-free putty designed for minor surface imperfections on body filler or steel, aluminium, galvanised metals and SMC. Spreads and sands easily with great feather-edging characteristics.

SIZE	CODE
2 Kg	BWFF

MATTING PASTE

A timesaving intercoat preparation enabling the best finish with minimum effort. Coating adhesion is enhanced due to cleanliness and consistent surface profiling. Ideal for preparing blends and use on and around doorjamb, around door locks, under seals, etc.

SIZE	CODE
3 Kg	BWMP

PAINT CUP SYSTEM DISPOSABLE

The BodyworX Disposable Paint Cup is available in both 125 μ m & 190 μ m filter screen versions. The BodyworX 125 μ m Disposable Paint Cup lid features a wide integrated filter that allows free flow of paint.

Velocity gun adaptors suit BodyworX Disposable Paint Cups. Adaptors are specifically designed for fast, easy and secure attachment and various styles are available to suit a wide range of available spray guns.

DESCRIPTION	SIZE	CODE
50x Liner Bags, 125 μ m Filtered Lids & Caps	600 mL	BW6125
50x Liner Bags, 190 μ m Filtered Lids & Caps	600 mL	BW6190
Calibrated Outer Cup with Screw Top Lid	600 mL	BW6C

PAINT STRIPPER PANEL / PANEL & BUMPER

Is a non-caustic stripper ideally suited to removing all automotive paint coatings. Suitable for the removal of 1K and 2K paints including automotive variations such as, epoxy, acrylics, water-based acrylics; also automotive and industrial enamels, lacquers, polyurethanes and more.

AEROSOL BUMPER STRIPPER

Is a unique formulation that will not swell or attack most urethanes. The viscous consistency clings to the bumper without sagging. It is designed to totally removed all refinish material but not the original factory-baked finish.

* Aerosol

SANDING GUIDE COATS

DRY SANDING

Also known as: Imperfection Sanding Guide

- Easy application
- Excellent results on either wet or dry sanding
- Does not contain solvents
- Does not clog abrasives
- No masking required
- Instant defect detection
- No dry time required
- Includes Applicator

COLOUR	SIZE	CODE
Black	100 gm	BWDG

SANDING GUIDE COATS

DYE GUIDE

BodyworX Blue Mist is a sprayable dye that penetrates the surface of primers. Applying one thin coat will highlight all fine imperfections and any sanding scratches in the primed surface prior to top coating. It is an excellent product to be used over SMC and fibreglass surfaces ie. buses, boats, planes, trains, cars, etc.

When applied over primed SMC or fibreglass surfaces, it exposes impact cracking that can occur on these surfaces.

COLOUR	SIZE	CODE
Blue	5 Litre	BWBM

SEALANTS / DRIP CHECK

A fast curing seam and joint sealer designed exclusively for automotive uses.

- Skins over quickly
- Paintable
- Non-Staining

Exhibits very good physical properties including excellent adhesion to most surfaces including: painted and non-painted metal, rubber, glass, wood, concrete.

COLOUR	SIZE	CODE
Black	148 mL	BWLSB
Grey	148 mL	BWLSG

SPOT PUTTY - ACRYLIC

Get the smoothest, glossiest top coat! Fills scratches, sanding marks, pinholes and other imperfections.

- Quick Drying
- Smooth Spreading
- Easy Sanding - Wet or Dry
- Excellent Adhesion
- Minimal Shrinkage
- Maximum Holdout

A finishing putty used to smooth minor defects and imperfections. Excellent for filling pinholes and minor scratches.

SIZE	CODE
454 gm	BWSP

STONE GUARDS
SOLVENT BASED

A solvent based, flexible, textured, underbody coating for stone chip and general road abrasion protection.

Suitable for sills, wheel arches, wing edges, front and rear aprons and general underbody protection for all cars, trucks, caravans and trailers. Also recommended for its sound deadening properties when used in the engine bay, luggage compartment, door wells and floor area.

* Aerosol

**VELOCITY
DISPOSABLE
PAINT CUPS**

The Velocity Disposable Paint Cup is available in both 125 µm & 190 µm filter screen versions.

The Velocity 125 µm Disposable Paint Cup lid features a wide integrated filter that allows free flow of paint.

Velocity gun adaptors are specifically designed for fast, easy and secure attachment and various styles are available to suit a wide range of available spray guns.

MIXING RATIOS

The Velocity Outer Cup features mixing ratios, directly printed, that replaces the need for an extra mixing cup.

EASY REFILLING

Unique design allows the lid to be re-opened, paint refilled and system re-sealed.

Removes: paints, inks, adhesives, lacquers and sealants

YOUR HANDS WILL LOVE IT

Expert the unique hand cleanser

Hi-tech professional hand cleanser especially for extreme specialist soilings that occur in body repair shops, construction, printing and painting industries. Expert is extremely suitable for the removal of paints, inks, adhesives, lacquers and sealants.

Product advantages

- Solvent-free
- Skin friendly micrograins for extra cleaning power
- Vitamins B5 and E for a healthy and supple skin

Cleaning Power: ++++

The **AUTO**Writer

Fast drying ink

Simple to remove with only water and a cloth

About the Autowriter

Autowriter is an innovative new marker developed for the auto body repair industry. Now body shop operators can mark clear instructions, quickly and easily, anywhere on a vehicle as it passes through their shop. At the end of the repair process simply wipe the vehicle clean! There's no permanent marking or damage. Autowriter's unique water soluble formula is tough enough to write on a surface, but is gentle enough to be removed with water and a cloth.

What makes Autowriter the write tool for the job?

- Writes on steel, glass, aluminium plastic, wood, rubber virtually any surface..
- Autowriter's shipping carton doubles as a convenient work station pen holder.
- No dry annoying dry markers. Just prime Autowriter for its initial use with the easy pumping action and you're ready to go.
- Unique cap stores spare Nib.
- Available in **BLUE, GREEN, ORANGE, PINK, RED, YELLOW, WHITE** and a mixed colour packet of 12.
- All Autowriters packed 12 per counter display.
- 7 vibrant colours allow you to colour code based on:
 - priority
 - department
 - staff
 - customers
 you can also order one colour for use in your whole shop.

TRUWHITE®

AUSTRALIAN PATENT #: 2014101510

This superior masking paper alternative offers the ultimate penetration resistance from all solvents used in today's gelcoat and paint systems.

This fully treated state-of-the-art formulation reduces contamination of freshly painted and varnished surfaces. It provides excellent conformability and holds up well under wet sanding conditions

Plastic that Works Like Paper...Only BETTER!

- Easy Bi-directional Hand Tear
- Solvent & Water-Based Paintable
- No Bleed Through
- Lint & Fibre-Free
- Static Cling to Surfaces
- Flake Resistant
- Neatly Conforms to Curves
- Recyclable

APPROVED

Combat Corrosion with:

EVAPO-RUST™

SUPER-SAFE RUST REMOVER
Rust removal has never been made easier!

GPI AUTOMOTIVE PRODUCTS Pty. Ltd.
275 Wellington Road, Mulgrave,
Victoria 3170, Australia
1800 334 898
www.gpi.com.au

Evapo-Rust™ is an amazing neutral pH rust REMOVER which has fully demonstrated it's ability to decrease the maintenance burden and decrease the cost and effort put into removing rust.

Evapo-Rust™ removes even deep rust on all types of mild steel and iron. This product is water based and does not require any special equipment or personal protective wear.

Evapo-Rust™ is non-corrosive to steel and does not harm Brass, Copper, Aluminium, Gold, Lead, Titanium, Steel, Cast Iron, Solder Points, Vinyl, Plastic, Rubber, Silicon, Glass, Cork or Wood.

Evapo-Rust™ -

- is not a primary eye irritant
- is not a skin irritant
- is non-toxic dermally or orally
- is non-hazardous
- contains no volatile organic compounds
- contains no hazardous air pollutants
- contains no solvents
- is bio-degradable
- contains no acids or caustics
- is non-corrosive
- is non-flammable

New into Australia is a product that has taken America by storm.

A harmless, bio-degradable product that removes rust as easily as the effort it takes to submerge an object in water.

Evapo-Rust technology is the only chemistry in the world employing selective chelation for rust removal.

How It Works:

Evapo-Rust™ works at a pH of 6.0 to 7 (Neutral) through selective chelation. This is a process in which a large synthetic molecule forms a bond with metals and holds them in solution. Most chelating agents bind many different metals. The active ingredient in Evapo-Rust™ bonds to iron exclusively. It can remove iron from iron oxide, but is too weak to remove iron from steel because the iron is held much more strongly.

Directions:

Evapo-Rust™ comes ready to use, and its use is very simple. The rusted object is fully immersed in this liquid and left to be cleaned. No scrubbing is necessary. Soak times will vary according to degree of rust. Light rust can be removed in as little as 5 minutes, up to heavy scale which may require soaking overnight. Evapo-Rust™ is waterbased, therefore the active molecules will slow down as temperature decreases, and increase when temperature increases. It is recommended to use Evapo-Rust™ at room temperature.

Water lost to evaporation must be continually replaced to maintain products ability to work. To slow down evaporation, cover container when not in use.

Cleaning vs De-rusting:

Evapo-Rust™ has a surfactant to aid in penetrating oils and dirt. However, surface contaminants DO slow the process. The soils must be penetrated before Evapo-Rust™ can come in contact with the rust. Additionally, heavy soil residue can shorten the life of Evapo-Rust™. Oils, Greases and Rust Preventative coatings should be removed prior to de-rusting. After De-Greasing, rinse thoroughly with freshwater to prevent solvents or de-greasers contaminating the Evapo-Rust solution. Re-dipping and air drying will provide about 10 - 14 days of rust inhibition.

Transportation:

Evapo-Rust™ is shipped by any regular freight service (non-hazardous).

Life Capacity/Storage:

Evapo-Rust™ has an indefinite shelf life and can be used over and over until it absolutely stops working. Only water is lost to evaporation. Evapo-Rust™ has a tremendously high work load. On average, 5 litres will de-rust up to 180Kg of light to moderately rusted steel! As the iron is removed from the iron oxide, carbon from the rust is released. Some parts may have a black film after using Evapo-Rust™. The black is carbon from the steel. Generally high carbon steel is used in making items that are flexible (i.e. Springs and Saw Blades et. cetera.). High carbon steel and tool alloy steel items, when de-rusted, will have a darker appearance. The carbon can be removed simply by wiping with a cloth when rinsing with water. Water Blasting gives best results. The more you de-rust, the blacker the solution becomes. Evapo-Rust™ is spent when the specific gravity reaches 1.08, it is pitch black, and no longer performs.

FAQs:

Why replace Acids with Evapo-Rust™?

- greatly enhance the safety in the workplace
- reduce and replace the use of hazardous / inherently dangerous materials (such as acids, caustics, converters, electrical and mechanical methods)
- reduce both hazardous emissions and disposal of hazardous goods
- resulting in increased productivity.

Will Evapo-Rust™ remove bluing and other oxide finishes?

Yes, in about 30 minutes. Anodizing will not be removed. Powder coating and paints that do not contain oxides won't be removed.

Can I clean brass, copper and aluminium with Evapo-Rust™?

No, it will not clean (or damage) any of these metals. It will not harm plastic, clothing or glass either.

Can I de-rust by spraying Evapo-Rust™ on the rusted area?

No, Evapo-Rust™ only works in liquid form, since the water in the solution will evaporate when sprayed. However, it can be sprayed on unrusted steel as a rust preventative.

How do I know when the bath is spent?

The bath will turn completely black and will not remove rust.

Priming

Best results are obtained by pressure washing to remove any contaminants prior to priming (water based or solvent based).

MOTOR GUARD CORPORATION

THE DUST DOCTOR

GPI CODE: JDD The Dust Doctor Sanding Block Cleaning Tool

Exclusive Features:

- Microfibre Outer Layer Traps Sanding Dust
- Soft Cushion Inner Layer Enhances Dust Collection
- Flexible Magnetic Backing Allows Pad Placement on the Body Panel or a Cart.
- Improves Shop Air Quality by Reducing Airborne Dust

The All New DUST DOCTOR

from Motor Guard revolutionises hand sanding by providing an instant means of cleaning loaded abrasive sheets. This unique tool utilises microfibre technology to pull sanding dust right from the paper. By dramatically reducing material costs as well as cutting down on the time spent changing paper, the cost savings are immediate.

The **DUST DOCTOR** provides the added benefit of improving shop air quality and cutting down on cleanup time.

Technology

VALV3 - 1.3mm
VALV4 - 1.4mm
VALV7 - 1.7mm

H-4000 L.V.M.P

Capacity of Cup: 600 mL
Pattern Width: ~29 cm
Optimal Spray Distance: 21 cm
Optimal Working Pressure: 2.5 bar / 36 psi
Maximum Working Pressure: 10.0 bars / 145 psi
Air Consumption: 5.6 cfm at 36 psi

VA92934
1.3 & 1.4mm
Twin Set-up

H-929 L.V.M.P

Nozzle Size: 1.3 & 1.4mm
Capacity of Cup: 600 mL
Pattern Width: ~27 cm
Optimal Spray Distance: 18 cm
Optimal Working Pressure: 2.0 bar / 29 psi
Maximum Working Pressure: 10.0 bars / 145 psi
Air Consumption: 5.2 cfm at 29 psi

VA9297 - 1.7mm

H-929 L.V.M.P

Nozzle Size: 1.7 mm
Capacity of Cup: 600 mL
Pattern Width: ~27 cm
Optimal Spray Distance: 18 cm
Optimal Working Pressure: 2.0 bar / 29 psi
Maximum Working Pressure: 10.0 bars / 145 psi
Air Consumption: 5.2 cfm at 29 psi

VAMLV1 - 1.0mm

MINI H-3000 L.V.M.P

Nozzle Size: 1.0mm
Capacity of Cup: 250 mL
Pattern Width: ~12 cm
Optimal Spray Distance: 15 cm
Optimal Working Pressure: 2.5 bar / 36 psi
Maximum Working Pressure: 5.0 bars / 73 psi
Air Consumption: 1.8 cfm at 28 psi

VA06 (With Built-in Air Adjuster)

DRYING-C AIR DRYING GUN

Air Consumption: 11 - 21 cfm
Optimal Working Pressure: 2.5 - 3.0 bar / 36 - 43 psi
Maximum Working Pressure: 12 bar / 174 psi

Bodyshops increasingly apply waterborne paints. Due to their physical properties, the curing of waterborne materials takes longer compared to solvent.

Consequently, longer cycle times diminish the productivity of the bodyshops.

The ITALCO drying gun reduces unproductive periods. The drying time of waterborne paints is significantly accelerated as a result of the continuous high-volume air flow, as water can be effectively removed from the surface.

**All ITALCO guns
presented in
plastic cases**
